Art Unit: 2816

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The disclosure is objected to because of the following informalities: the prior application numbers listed on page 1 of the specification should be updated to reflect the fact that they are now U.S. patents.

Appropriate correction is required.

3. Claims 1 and 2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,707,327 and claims 1-22 of U.S. Patent No. 6,570,417. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are fully anticipated by (i.e., read directly on) the claims of the two prior patents.

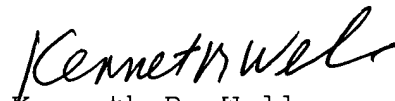

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is (571)272-1757. The examiner
